EDUCATION

Government College University Faisalabad

Faisalabad Punjab, Pakistan

BS Software Engineering

2022 to 2026

PROFILE SUMMARY

Frontend developer specializing in React and React Native, with a solid foundation in modern web technologies. Experienced in building

responsive, offline-capable web applications and cross-platform mobile interfaces, with a focus on clean UI/UX, performance optimization, and seamless user experience. Seeking an entry-level or internship role to apply and grow these skills within a product-focused engineering team.

Skills

Languages & Core

JavaScript (ES6+)

HTML5

CSS3

Frameworks & Libraries

React.js

React Native

Tailwind CSS

Framer Motion

Bootstrap

Backend & Data

Supabase

REST APIs (Axios / Fetch)

Dexie.js (IndexedDB)

Firebase

Tools & Practices

Git & GitHub

Figma

Responsive Design

PWA

Offline-first Architecture

PROJECTS

Mr YUM POS System

[Live Demo](#) · [GitHub](#)

React 19, Vite, Tailwind CSS, Supabase, Dexie.js, React Router

- Built an offline-first point-of-sale system for a bakery & retail store, installable as a PWA that keeps working with zero internet connection
- Designed a local-first sync architecture using IndexedDB (Dexie.js) as the source of truth with a background sync engine to Supabase (Postgres, Auth, Storage)
- Implemented role-based staff access, billing/register, inventory with full audit trail, suppliers, customers, credit accounts, and sales reports

Camera-Based Inventory System

[GitHub](#)

Python, FastAPI, YOLOv8, OpenCV, SQLite, React, Vite

- Built a real-time shelf-monitoring system using a trained YOLOv8 model over an OpenCV pipeline to detect product movement from a live camera feed
- Designed zone-based tracking with an occlusion/blocker check so partial camera obstruction doesn't corrupt stock counts
- Streamed labeled detection frames and stock events to a React dashboard in real time over WebSockets

Portfolio Website

[Live Demo](#) · [GitHub](#)

React.js, JavaScript, Tailwind CSS, Framer Motion

- Developed a dynamic, fully responsive portfolio with component-based architecture and a custom animated dark theme
- Implemented smooth navigation, interactive project galleries, and performance-optimized rendering
